Place for next meeting, Indianapolis, Ind., second Wednesday in June, 1895.

Society of American Florists.

J. T. Anthony, Chicago, President; Robert Kift, Philadelphia, Vice-President; Wm. J. Stewart, 67 Bromfield St., Boston, Mass., Secretary; Wm. J. Stewart, Treasurer pro tem. Place of eleventh annual meeting: Pittsburgh, Pa., August, 1895.

Am. Seed Trade Association.

D. I. Bushnell, St. Louis, President; S. E. Briggs, Toronto, 1st Vice-president; A. L. Don, 114 Chambers street, New York, Secretary and Treasurer.

American Pomological Society.

Hon. P. J. Berckmans, Augusta, Ga., President; Chas. L. Watrous, Des Moines, Iowa, First Vice-President; Geo. C. Brackett, Lawrence, Kansas, Secretary; Benj. J. Smith, Cambridge, Mass., Treasurer. Place of next meeting: Sacramento, Cal., in January, 1895.

We purpose to mail this paper to every nurseryman, florist and seedsman in the United States, and to leading firms in the same vocations in foreign countries. We do not solicit subscriptions. If you value THE PRACTICAL NURSERYMAN, please accept it with our compliments

The Value of Fungicides.

Fruit growers have hardly come to realize what a profitable field the discovery of the value of fungicides has opened up to them. It is most surprising to notice the revolution in fruit growing it has already accomplished.

We have now in our markets, in some abundance, plums, apples, grapes and apricots, to which we have been unaccustomed, comparatively, for some time past, and these fruits have been produced by the proper use of insecticides and fungicides. The codlin moth is driven from the apple, the curculio from the plum and the apricot, and the black rot from the grape, by these means. Farmers have again a chance to add to their profits by securing crops of fruits. There is no question of the efficacy of these poisons. The profit will be his who realizes this the first, and who proceeds to spray his trees before his neighbor has heard of the use of poisons. There is ample time before spring comes when spraying should commence, to become thoroughly acquainted with the different compound and their uses. The National Government has issued pamphlets on the subject, so have many of the agricultural colleges and all the agricultural papers of any note have had more or less to say on the subject during the past year. There seems good reason to hope that by spraying the trees, Western fruit growers may be able to grow the pear. True, it is the fire blight which is the foe at present, and not the leaf blight, which troubles Eastern trees, and which is not so formidable. But from what has been learned of the efficacy of the poisons here, it is confidently believed that the dreaded fire blight will fail of its work where trees are regularly sprayed. The National Government has recently issued a pamphlet setting forth the result of experiments on pear trees to ascertain the possibility of successfully combating the ravages of leaf blight. The result of the work was most gratifying. Not only were the pear trees kept entirely healthy

from their seedling stage to after they were budded and the buds had become young trees, but there seems but little doubt that the spraying they received not only prevented leaf blight but stimulated the plants to a better growth as well.

It is well known among nurserymen that, as a rule, pear and cherry seedlings have to be imported from Europe, because that leaf blight prevents the growth of them here. It would seem that the time has come when this importation need no longer be. The spraying of the seedlings will keep down leaf blight.

In the case of large pear trees attacked by leaf blight, and almost killed by it, I have seen them completely restored in two or three years by spraying two or three times in early spring and summer with the Bordeaux mixture. It will certainly pay farmers and fruit growers to become thoroughly familiar with this subject before spring comes.—Joseph Meehan, in *Prairie Farmer*.

Guy B. Pearsall.

It is with deep sorrow that we announce the death of Guy B. Pearsall, a promising young man, son of our well known and valued, Col. U. B. Pearsall, of Ft. Scott, Kansas. How inscrutable are the laws of life. The young man of 23 years, surrounded by peace and security, is stricken down, whilst the father, who passed through all the dangers of active service during the civil war, is still preserved. We are sure that all who know Col. Pearsall will join us in extending him our united and deepest sympathy in his bereavement.

The Weather.

The ground is covered with snow and the streets are in fine condition for sleighing. The thermometer registered four degrees below zero on the night of the 31st ult. We usually have cold weather here about the first of January, but the mercury rarely goes below zero. The coldest spells usually range from six above down to zero, but such weather lasts only a day or two and comes but once a year.

The American Pomological Society.

The twenty-fourth session of the American Pomological Society will be held at Sacramento, Cal., the 16th, 17th and 18th inst.

Advertising.

One of our prominent advertisers writes that he has had better results from his advertisement in *THE PRACTICAL NURSERYMAN* than from any other paper.

Variations in the Odors of Flowers.

"In the July issue is an article entitled, 'Variation in the Odors of Flowers', in which the question is asked, 'Has climate anything to do with it?' I think it has. I think mignonette, roses, azaleas, in fact nearly all odoriferous flowers are more fragrant in a moist than dry atmosphere. When I came to this country I fancied that roses of the same varieties were not so fragrant as in the northeastern part of England. When I came west we were disappointed at the flowers of some species not being so fragrant as in New England, especially in our hot, parching weather, and I think you will notice that flowers are more fragrant on a dewy morning than when the ground is dry and parched. But let us go further, and see if it does not hold good in trees.

The white spruce from Maine and Lower Canada has such a strong odor that it is called 'Skunk Spruce.' The odor of this tree in the drier atmosphere of Minnesota is not nearly as strong. I found the same tree near the summit of Terry's Peak, in the Black Hills of Dakota, and I had to rub a twig with the foliage, and bruise it in my hands, before I could perceive any odor, and what is more, I brought a small tree from Terry's Peak, and after it grew here two years, it had a perceptible odor.

Now if that is not enough, 'GO TO THE DOGS,' if you are a hunter, and you will see how nicely he will follow scent in the morning, while the dew is on the grass, and how often he will be at fault in the heat of the day when all is dry and parched.

Many good lessons may be learned from dogs in the way of odors. You will often see a dog that has picked up a piece of meat that is so tainted that he cannot eat it. He carries it to a place where he finds earth perfectly dry, scratches a cavity, covers the meat carefully with dry earth, goes back the next day, and digs it up free from odor; many of the human family might learn profitable lessons from dogs. A few shovels full of dry earth would deodorize many disagreeable odors in back alleys.

Many good traits may be learned from dogs.

'Dogs will not bark at those they love, nor fawn on those they hate.'—Robert Douglas, in *Meehan's Monthly*.

THE PRACTICAL NURSERYMAN.

THE HUNTSVILLE WHOLESALE NURSERIES PRICE LIST.

THE HUNTSVILLE WHOLESALE NURSERIES.

In this issue of our price list we show the numbers, sizes and prices in all varieties remaining unsold at this date. Correspondents should, however, give us the privilege of substituting varieties, sizes and prices, as far as it can be allowed, if in a hurry for shipment, as we do not substitute, as a rule, without permission.

Two year old Kieffers will be scarce for the Fall of 1895. Those who desire to make a specialty of them in their sales through agents or dealers, had better engage them of us early in the season. We are ready to make prices at any time.

The Willard Plum will make a good selling specialty, as the earliest Japanese Plum. It is earlier than Wild Goose, or any of the European varieties. Get plates of it now for agents' use. The price next Fall will be the same as for other Japanese sorts.

Kieffer Pears, two years old, are very scarce. Our big one year trees will do. See our quotations.

Apple Seedlings f. o. b. at Huntsville, No. 1, 3-16 and all up, @ \$2.50 per 1000, in 5 M and 10 M lots.

We are sold out of Wragg, Eng. Morello and Ostheim, two years old. We have a good supply of one year olds, 2 to 3 feet. See October list for prices.

The Baltimore Belle and Queen of Prairie Roses we offer at \$30 and \$25 per 1000 are very fine plants,—as fine as can be bought anywhere. Will send samples if desired.

See reduction in prices on Figs. No injury from frost. We have a large stock of Celestial—the hardiest and best sort for canning and preserving.

Notice the price made on Standard Pears, $\frac{3}{4}$ to 1 inch and 11-16 to $\frac{3}{4}$ inch, this month. We have a surplus of Bartletts, and will make special prices on them in car lots.

We have a large stock of *Prunus Pissardii* on Marianna stocks; fine low heads, two years old, very handsome. See special prices.

THE HUNTSVILLE WHOLESALE NURSERIES.

We are the largest propagators of Japanese Plums, and have on hand the most complete assortment to be found in any nursery. Our varieties are correctly named and may be accepted as the standard in nomenclature.

We have a large stock of Orange and Meech's Prolific Quinces one year, from one foot high and upwards. Good plants true to name are scarce. Our trees are grown from grafts, made of cions taken from bearing orchards, and we know them to be pure.

UNSOLICITED COMMENDATION.

WISCONSIN, Nov. 26, 1894.—The box of trees arrived the 24th. They were on the road during the cold spell, but there was not the least bit of frost in them. The trees were as usual fully up to grade, and of extra quality with surprising long roots, compared to those from a whole root nursery. You can justly make the claim that your trees are whole rooted.

KANSAS, Nov. 28, 1894.—In looking over an agricultural report, I notice that a Mr. Snyder, of Kansas, speaks of buying excellent nursery stock of parties at Huntsville, Ala. If you are acquainted with any parties in your vicinity who raise or handle fruit trees, will you kindly send name and address. Would like to correspond with a nurseryman with a view to buying trees.

TEXAS, Nov. 27, 1894.—Having seen a copy of THE PRACTICAL NURSERYMAN at a friend's office, and appreciating its great value to the nurseryman, I would kindly ask you to enter my name on your permanent mailing list. By complying with the request, you will greatly oblige.

NORTH CAROLINA, Dec. 13, 1894.—I received the trees in splendid condition, and was well pleased with them.

MISSISSIPPI, Dec. 6, 1894.—I have had the best of luck in getting my trees to grow. Have only lost two Kieffer pear trees out of the whole lot.

KANSAS, Nov. 19, 1894.—Enclosed find copy for ad. to occupy one page in the P. N. We never placed an ad. anywhere that did us so much good.

The Huntsville Wholesale Nurseries,

JESSIE S. MOSS, PROPRIETOR.

APPLE SEEDLINGS } Nebraska grown. No. 1, 3-16 and all up, \$2.50 per 1000, f. o. b. at Huntsville, Ala.

HEIKES--HUNTSVILLE--TREES.

Always address all correspondence to

W. F. HEIKES, Manager,
HUNTSVILLE, ALABAMA.

Terms and Conditions Governing Quotations in the Price List of the Huntsville Wholesale Nurseries.

RATES.—As we send this list to the trade only, we make the difference in prices between the 10, 100 and 1000 rates very slight—simply sufficient, as a rule, to cover the difference in the expense of handling in the smaller numbers. We uniformly tie in bunches of 10, when consistent with the order, and we suggest to our customers to make their orders for varieties in multiples of 10 as far as practicable. Orders for 50 and not over 300 trees, if for not less than 10 of a variety, will be charged at the rate per hundred. Orders requiring 300 trees or more, and not less than 10 of a variety, will be filled at the lowest quoted prices. Orders for less than 10 trees of one variety, will be charged at the rate per ten.

SEASON.—Our packing and shipping season begins by the 20th of September, and continues until about the first of March.

We have great advantages to offer here in early shipments for the North in Spring. We do not accept orders for trees we do not grow, as we never buy trees to sell again. You can depend upon us for fresh dug trees. Each order is taken up separately, and not until it is wanted for shipment.

SHIPPING DIRECTIONS.—We respectfully beg our patrons to furnish us with explicit directions as to shipping, and the mode of conveyance, by which they desire trees forwarded. When no particular directions are given, we forward according to the best of our judgment. *But in no case do we assume any responsibility as to safe delivery and condition of Trees and Plants* after a proper shipment by us.

RELEASE.—When prepayment of freight is not required, we will Release and Guarantee, and take forwarder's receipt and mail to consignee. It is left to the option of the shipper of trees over some railroads, whether he will release them or not under the clause "Value less than \$5.00 per 100 lbs." If released under this clause, the freight is less on roads governed by this classification, and we will assume it to be proper to make this release, without reference to the value of the trees, unless instructed to the contrary. This clause does not apply upon roads under some of the district classifications, and because of this confusion we will not be held responsible for any oversight to release, unless instructed by our customers. Claims for delay or loss must be made to the forwarders.

PACKAGES.—The cost of package must be added to the prices quoted in this list, as follows: Boxes 30 inches square, from 7½ to 9 feet long, as the trees may require, each \$2.50; boxes 24 inches, \$2.00; boxes 18 inches, \$1.50; bales from 25c. to 75c. each.

PACKING.—Goods will be packed in moss, and especial care taken to insure their arrival in the best condition.

ASSORTMENTS.—We do not require customers to take an assortment they do not wish, but will sell one variety alone if desired. If any substitution can be allowed, either in grade or variety, it should be so stated when making the order. As a rule we do not substitute without permission.

CAUTION.—We accept all orders upon the condition that they shall be void, should any injury befall the trees from frost, hail, storm, fire, or other causes over which we have no control.

TERMS.—Cash. When desired, we will allow 30 to 60 days from date of shipment, to responsible,

prompt-paying customers. Parties with whom we have had no business transactions, will save time by sending reference, Bank, if possible, with order. We wish it expressly understood that payment is expected from the first collections made, and the time named is only intended as so many days of grace in which to make returns. To northern customers, who wish to lay in stock for Spring trade, we will ship late in Fall or early in Spring, and allow time for payment till May 15th. If shipment is required in the Fall for Spring use, a note is to be given upon receipt of the trees. We do not allow any discount for cash, but we make our prices low to command cash, or prompt returns. In orders when the time is not mentioned, 30 days is to be understood. Interest at the rate of 8 per cent. per annum must be paid on over due accounts. Should prices be changed, either higher or lower, during the season, the prices ruling at the time the order is made, are expected to stand.

FORMS OF PAYMENT.—All bills are payable at the office of the seller, and remittances should be made by drafts on New York, Chicago or St. Louis, or by money orders on some Express Company, or by postal orders. We will, however, accept checks from those of our customers who may be located at places having no banking, express or postal facilities, provided they make them in every case payable "with exchange", or add ¼ of one cent, to the amount of the bill for the cost of collection.

GRADES.—We grade very carefully, in some cases by caliper, in others by height. When graded by both caliper and height, the caliper must govern, as the height then named is only to be considered approximately. When graded by height or caliper, we include the lower number and exclude the higher. Instance: in a grade of 4 to 5 feet trees, the 4 feet trees are included, but not the 5 feet trees. If 5 feet trees are wanted, the 5 to 6 feet grade must be ordered.

GUARANTEE OF GENUINENESS.—While we exercise the greatest diligence and care to have all our Trees, etc., true to label and hold ourselves in readiness, on proper proof, to replace all trees, etc., that may prove untrue to label, free of charge, or refund the amount paid, it is mutually understood and agreed to, between the purchaser and ourselves, that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for said trees, etc., that shall prove untrue.

ACCEPTANCE.—Notice should be sent us by telegraph, at our expense, if there is any cause of complaint, or should the trees be refused, stating reasons. Claims for deduction, from whatever cause, will receive consideration only when made promptly upon the receipt of the trees. If trees show any signs of shrivelling upon arrival, they can usually be restored by being thoroughly watered and buried entirely under the ground for two or three days. Should there be any frost in the trees upon arrival, they should not be removed from the box until the frost is all out. The box should be placed in the cellar or protected in some other way. The presence of frost in the boxes is not to be considered an evidence of bad condition, as we pack to secure the trees against damage, if the frost is allowed to come out in the natural way. Goods will be considered accepted if removed from the boxes in which they are packed, without notice of complaint to us, and without our orders for their disposition.

Just the Thing.

A STUMP PULLER.

In the Genuine Smith Grubber we claim the most perfect machine ever invented for pulling trees, stumps, cleaning timber-land, moving buildings, and for work where a windlass is necessary.

We claim that in proper use the machine will pay for itself in a week; inexperienced hands have averaged one-half acre a day in close timber with this machine; it practically does away with the labor of ten men; trees are pulled out of the ground more rapidly than two men can chop them down; it requires but one minute to pull a tree six and seven inches through!

More than 5,000 of these machines have been sold since the first patent was issued, in 1882. No purchaser has ever entered a complaint. We challenge such! Our machine is a pronounced success.

—We have just tried your machine in pulling Black Jack and Old Field Pine. It is more powerful than we supposed, and the effective work done with it is surprising.—W. F. HEIKES.
